PROFESSIONAL SUMMARY

Specialized in production-grade enterprise data platforms and AI Driven solution systems. I design and deliver end-to-end AI solutions including demand forecasting pipelines, computer vision, NLP, Generative AI, Agentic AI, and cloud-based analytics architectures. Focused on building scalable, explainable, and business-critical AI systems that directly impact financial and operational performance.

TECHNICAL SKILLS

Programming: Python, JavaScript, GO, C++, HTML, CSS, Lua.

Frameworks: Django, Node.js, Flask, React.

Databases: MySQL, Microsoft SQL Server, PostgreSQL, Microsoft Excel.

BI Tools: Microsoft Power BI, Microsoft Fabric, Microsoft Power Platform, Tableau, SSRS.

Cloud: Azure OpenAI, Azure AI Foundry, Azure Synapse, AWS, GCP.

AI: OpenAI, Anthropic, Gemini

OS: Windows Server, macOS, Linux.

PROFESSIONAL EXPERIENCE

AI Engineer (Applied ML & Analytics) – | RAVE Co. | Oct 2025 – Present

- Developed and maintained AI solutions using Azure Open AI and Azure AI Foundry.
- Developed and maintained a modular Machine learning testing Suite with more 7+ models (LightGBM, XGBoost, CatBoost, Croston-SBA, TSB, ElasticNet, etc) for demand forecasting.
- Architected Microsoft Fabric solutions.
- Developed a large-scale AI Agent for high-volume document data extraction.
- Develop Custom built Desktop and Web applications for Operations.

Senior Data Analyst – Operations | [SAFRAN](#) | Sep 2024 – Oct 2025

- Lead AI integration initiatives for Operations, managing Azure OpenAI deployments, permissions, and cost controls.
- Built an automated supplier report generator system that saved thousands of labor hours annually, and throughput of all the members(13+) of the Purchasing department.
- Developed AI-powered PDF data extraction pipelines, converting documents into secure datasets, used for clamming more than \$2M in Duty Drawbacks in imports and exports
- Designed and implemented BI workflows (Power BI, SQL, DAX) to standardize KPIs and reporting, improving departmental On-Time Delivery (OTD) performance by over +60% and reducing excess inventory from \$20M to \$2M.
- Created ERP data archives for historical trend and statistical analysis.
- Designed, managed, and maintained all core Operations reporting architecture.

Data Analyst – Operations | [SAFRAN](#) | Apr 2023 – Sep 2024

- Designed and maintained data models to support BI reporting.
- Automated datasets and dataflows using Power BI Service and Microsoft Fabric.
- Created dashboards for supply chain performance, OTD metrics, Operations KPI.
- Designed workflows for internal process improvement.

Data Administrator | [MAXIMUS](#) | Mar 2022 – Mar 2023

- Managed HR databases and ensured data integrity.
- Automated workflows using Power Automate.
- Built reports with Power BI, SQL, and Excel to support decision-making.

Data Analyst | [FOA Services](#) | Jan 2020 – Feb 2022

- Built automated reports and dashboards in Power BI, Tableau, and Excel.
- Developed tools to extract and transform data from multiple sources.
- Delivered insights to clients, improving operational efficiency.

Technical Support Technician | Ramiro's Property Management | Jun 2019 – Sep 2020

- Maintained network systems and implemented backup procedures.
- Managed tenant service requests and vendor scheduling.

Database Administrator | CyberHun | Dec 2014 – Apr 2017

- Managed MySQL databases, performed updates, and ensured data security.
- Conducted backups, recovery, and replication operations.

EDUCATION

IBM Data Analyst Professional Certificate – Coursera | 2020 – 2023

Bachelor's Degree – Universidad Catolica Del Tachira | 2012 – 2017

High School Degree in Informatica – College Pirineos Don Bosco | 2003 – 2008
